

New Storage and Covered garden space!

For those you who don't know me I do like a project! I managed to get a very small amount of money from Oxfordshire County Council to enable us to extend the outside space for the Hive, that will be covered, enabling outside play in all weathers more easily! It is also an opportunity to get rid of some old sheds and build some accessible storage to easily access resources. We have a small, local landscape gardening company completing the work over the Christmas holiday (weather and Virus Permitting! I just wanted to share the before pictures and the plan for the space, drawn by me, (which is to scale). We will need to have some plants so if you have any shrubs you don't want let me know, they would be planted in tyres! The old sheds wood will be repurposed into storage.

It is a small space but I hope it will make an interesting space for the children and hope it will develop over time!
